

# OVING PARISH PLAN

Action point template

**Subject Investigated:** HEALTH

**Survey Question Numbers:** Q19

**Description of the perceived need:**

GP Surgery

**Summary of the relevant survey data:**

Q19 Do you have any other suggestions for new community facilities in Oving Parish or improvement to existing ones. This can include facilities provided by Oving Parish Council or provided by others.

Four responses indicated a need for a GP surgery. However, additional developments at, for example, Shopwyke Lakes may further emphasise a need for additional infrastructure.

**Description of response proposed:**

Discuss options with existing surgeries who may be willing to consider developing a surgery in the Parish

**Feasibility of response:**

Feasibility highly likely given developments planned for the parish. Nearest surgeries at Tangmere and Cathedral Medical Group, Chichester

**The agency which is ultimately responsible:**

OPC to communicate with local surgeries and local Clinical Commissioning Group.

**Those who will benefit among the community:**

All residents of the parish

**Time frame & estimated costs if known:**

Immediate/ongoing and potential cost for surgeries

**Plans already in process or proposed which may be relevant:**

Is the waiting list for Tangmere's surgery full? If it is not possible for new residents to join an existing surgery then this makes the need for an additional surgery more imperative. Will the new development at Shopwhyke Lakes attract a local practice?
